# Our strategy

**01**  
Our strategy

These are the **3 values** that guide our decisions, offering consumers solutions that improve their day to day and are respectful of society and the environment.

**01** Sustainability

**02** Practicality

**03** Innovation and Design

## 01 Our strategy

# 01 Sustainability

At TATAY we **fight against throwaway consumerism**. That's why we understand sustainability as **durability**.

In addition, we are leaders in the use of **eco materials**, maintaining our commitment to **society and the planet**.

## 01 Our strategy

## 02 Quality

At TATAY we have always been committed to **quality** as the **fundamental pillar** that guides all **our operations**.

Our products are designed to facilitate the day to day of consumers, and so that they can be used for a very long time.

## 01 Our strategy

## 03 Innovation and Design

At TATAY, **innovation** and **design** are part of our DNA, and we transmit it in everything we do.

We make a difference through creativity, that's why in our products you will find the most current designs and materials on the market.

02

# Our 360° vision on sustainability

**02**  
Our 360° vision on  
sustainability

**At TATAY we have  
a 360° vision about  
sustainability**

**01** We monitor the origin of the raw material.

**02** We produce in the most efficient way.

**03** We use 100% renewable energies.

**04** We have a '0 waste' policy.

**05** We design products with  
durability and easy recycling in mind.

**06** We eliminate non-essential packaging .

**07** We limit our CO<sub>2</sub> emissions.

**08** We are certified under all the main  
environmental certifications.

**09** We promote CSR projects.

## 02

Our 360° vision on sustainability

## 01

## We monitor the origin of the raw material with local purchases

At TATAY we are **committed to social and environmental sustainability, which means monitoring the origin of our raw material, always in accordance with the rules, and making local purchases, supporting the local economy and minimising the impact of transport.**

In addition, we regularly use **recycled raw materials**. In 2021 we multiplied their use by **200%** and in 2022 we expect to increase it by up to **500%**.

We also make investments in industrial equipment that allow us to meet our medium and long-term objectives:

- Goal 2025: **50%\***
- Goal 2030: **80%\***

As an example of this unwavering commitment, we are proud of the recent launch of **TATAY ECOHOME**, our first range of products made with 100% recycled materials.

\* Excluded products that require food certification.

## 02

Our 360° vision on sustainability

## 02

## We produce in the most efficient way

When we talk about the sustainability of a material, we look at its entire life cycle. And the manufacturing process of our products is highly efficient and **environmentally friendly**.

We maintain a constant investment in machinery that allows us to reduce the energy need and maintain high productivity.

Therefore, we can say that **Tatay products are sustainable**: use of recycled materials, efficient manufacturing, long service life and easy to recycle, **facilitating and promoting the circular economy**.

**02**

Our 360° vision on sustainability

**03**

## We use renewable energies

Because of our social awareness and responsibility as a company, we certify that **100% of the electricity we buy comes from renewable energy sources.**

In addition, for many years now, mobility within the factory is done with electric trucks, **which have helped us eliminate the release of polluting gases.**

## 02

Our 360° vision on sustainability

## 04

## We have a '0 waste' policy

At Tatay we fight every day against the creation of waste, including our own, and we have had a '**0 waste**' policy for over **20 years**.

Therefore, we recover and reintroduce into the production process **100% of the waste generated**.

**02**

Our 360° vision on sustainability

**05**

## We design products with durability and easy recycling in mind

**We combat the 'use and throw' culture** by designing products that can be used for many years to come. **That's why our motto is Designed to Last.**

And as **80% of the social and environmental impacts of a product are decided in the design phase**, at TATAY we are committed to using sustainable materials, and we design easily recyclable products, supporting the **circular economy**.

## 02

Our 360° vision on sustainability

## 06

### We eliminate non-essential packaging and use FSC-certified cardboard

The 3 Rs (Reduce, Reuse, Recycle) are the guideline for our operations. And to comply with the first R, **we only use packaging that is strictly necessary to put the product in the hands of the consumer. We have also eliminated PVC packaging, limiting its use to those products that strictly need it.**

In addition, **all the cardboard we use is FSC certified.**

The mark of  
responsible forestry  
FSC® A000504

**02**  
Our 360° vision on sustainability

**07**  
We limit our CO<sub>2</sub> emissions from transport

Local manufacturing is one of the best tools we have to reduce emissions from transport.

At TATAY we are committed to the location of the manufacture of most of our products in Spain, which allows us to significantly limit the emissions we generate.

## 02

Our 360° vision on sustainability

## 08

## We are certified under all the main environmental certifications

Transparency is in our DNA, which is why we have the following environmental certifications that attest to this: **ISO 14001, Envirocat, Ecoembes, 'Green Energy' Certificate, SGS Certificate traceability eco-recovered material and internal code of conduct.**

In addition, we are continuously exposed to the analysis and **certification of regulatory agents**, and as suppliers of the main distribution chains around the world we are also certified by them through external audits, where sustainability is always a relevant part of the study, with increasing weight and relevance.

## 02

## Our 360° vision on sustainability

### Quality promises

Our goal is to always offer the highest quality to our customers. That's why we are certified under the strict, globally recognised ISO 9001, which sets out the requirements of a quality management system and allows TATAY to demonstrate and accredit its ability to meet customer requirements.

### Commitment to the environment

The ISO 14001 standard helps us manage and identify the environmental risks that may occur internally in the company while we carry out our activity. With the identification and management of the risks achieved with this standard we can prevent potential incidents and ensure optimal protection of the environment.

### We encourage recycling

We design our products to last for many years, and we minimise the use of packaging to favour their recycling.

That's why we collaborate with Ecoembes, a non-profit organisation that coordinates the recycling of light domestic packaging in Spain and helps companies integrate ecodesign in the manufacture of their packaging to promote the reduction in the generation of waste.

Ecoembes facilitates this chain that unites citizens, municipalities and companies so that, together, we make possible the recycling of packaging, thus contributing to the circular economy.

02

Our 360° vision on sustainability

# Energy certificate

**100% GUARANTEES FROM RENEWABLE ORIGIN**

ENERGIA VIVA certifies a supply of electricity from 100% renewable sources\* in favour of:

**CUSTOMER: PLASTICOS TATAY S.A.**

*Supply period: 01/01/2021 – 31/12/2022*

*Type: Renewable Year 2022*

\* Certified by the CNMC

## 02

Our 360° vision on sustainability

## 09

## We promote CSR projects in schools

We carry out projects in schools to raise awareness among children about the importance of **eliminating the use of disposable materials** that generate a large amount of waste, offering them alternatives through sustainable and durable solutions such as reusable portabokatas or sandwich holders.

Because generating environmental awareness in the little ones is the way to change society in the long term.

**02**

Our 360° vision on  
sustainability

## Objectives

	<b>2021</b>	<b>2022</b>	<b>2022</b>	<b>2030</b>
<b>Use of recycled materials</b>	2%	10%	50%	80%
<b>PVC Packaging</b>	10%	2%	1%	0%

03

# Our vision on the climate challenge

**03****Our vision on the climate challenge**

Plastic is our ally to limit energy consumption, reduce CO<sub>2</sub> emissions and reduce food waste, all of which are fundamental to combating climate change.

**We need to start seeing plastic as part of the solution and not the problem.**
